Earth Day April 22, 2018

End Plastic Pollution

Reprinted from the EDN website:

Earth Day Network, the organization that leads Earth Day worldwide on April 22, today announced that Earth Day 2018 will focus on mobilizing the world to End Plastic Pollution, including creating support for a global effort to eliminate single use plastics along with uniform regulation for the disposal of plastics.

From poisoning and injuring marine life to the ubiquitous presence of plastics in our food to disrupting human hormones and causing major life-threatening diseases and early puberty, the exponential growth of plastics is threatening our planet's survival. EDN has built a multi-year campaign to **End Plastic Pollution**. Our goals include ending single use plastics, promoting alternatives to fossil fuel-based materials, promoting 100 percent recycling of plastics, corporate and government accountability and changing human behavior concerning plastics.
