## Did You Know...

...polar bears are actually black, not white? Polar bear fur is translucent, and only appears white because it reflects visible light. Beneath all that thick fur, their skin is jet black.

...one million Earths could fit inside the sun – and the sun is considered an average-size star?

...the average snowflake falls at about 3 mph?

...at birth he was named Michael King, but his father later changed his name to Martin Luther King, Jr.?
